

Graduate Opportunities Asia 2008

Information Services Division

The Macquarie Group is one of the largest international providers of specialist investment, advisory and financial services headquartered in the Asia-Pacific region. For the past 15 years, Macquarie has reported record profits and consistent growth due to significant international expansion and now employs more than 10,700 people across 24 countries. Macquarie has been active in Asia for over a decade, establishing our first office in Hong Kong in 1994. Today we have more than 1,700 professionals across 11 markets in Asia.

Key to Macquarie's success is a unique management style that provides individual businesses with a balance between operating freedom, controls on risk limits and observance of professional standards. This philosophy encourages a sense of ownership and entrepreneurial endeavour among our people and has produced a stream of major financial innovations throughout Macquarie's history.

The Information Services Division (ISD) is responsible for the management of Macquarie's global technology infrastructure, the support and development of existing business systems, and the delivery and deployment of new systems, technologies and services. Each of Macquarie's business Groups have a dedicated IT team partnering with them to understand the Group's specific technology needs and to provide innovative and effective IT solutions.

In Hong Kong, Singapore & Japan graduate opportunities exist within ISD across the following teams:

- the Macquarie Securities Asia (MSA) Account team which provides technology support for the Macquarie Securities business across Asia;
- the Equity Markets Group (EMG) Account team which delivers trading and risk management systems for the Equity Markets business;
- the Alternative Strategies Division (ASD) Account team which develops and implements trading systems, electronic market interfaces, real time position-keeping systems and applications for presenting real-time market information; and
- the Infrastructure Technology Services team which is responsible for the management and delivery of the Group's technology infrastructure and comprises a number of technical specialist teams that provide constant support for mission-critical systems.

In ISD, we seek high-calibre applicants from a range of disciplines, including computer science, computer and software engineering, information technology, engineering, maths, physics, and combined degrees. In addition to this, we look for:

- high levels of motivation
- above average analytical skills
- excellent communication skills
- the ability to get along with people
- entrepreneurialism
- creativity
- a strong sense of discipline and ethics

Applicants should also possess a strong interest in applying their technical knowledge within the financial services sector, as well as the desire to work as part of a successful team.

To apply, please submit a covering letter, resume and academic transcripts as a single document to job number 365129 via our website at
