

Nelson Chow

Director, Advisory Services, EY Greater China
Ernst & Young Advisory Services Limited

Topic: Intelligent Automation: how does that impact business operations?

Abstract:

There are new business models changing how companies operate in the increasingly digital world. Leading companies are using technologies to enhance customer experience and drive operational efficiency. We will be sharing some practical examples on how robotic process automation (RPA), blockchain, machine learning and AI improve efficiencies and user experiences.

Biography:

Nelson is the finance and procurement leader of EY Greater China Advisory practice. Nelson has been assisting CEOs, CFOs and CPOs in transformational initiatives to drive growth, operation excellence and margin improvement for many years.
